WHAT WE DO

Innovation Skåne supports innovation and regional development in several ways.

TRACK RECORD

We have a great track record and long experience from our startup support; offering entrepreneurs and innovators professional advice, relevant networking and partnerships. We help hundreds of entrepreneurs every year in their ambitions to become internationally successful companies, companies that create new jobs, solve global place.

IN NUMBERS

1=4

Research shows that one new highly professional job in a fast growing company (innovative, entrepreneurial and international) creates three more new jobs within the local labor market.
Classic attractions

THE ÖRESUND BRIDGE

Now the star of a detective series, this famous 16 kilometre long bridge links Copenhagen and Malmö. Supporting both a motorway and railway, the Öresund Bridge makes the 20 minute journey a pure delight going from the capital of Denmark to Skåne’s largest city.
Rising costs hamper mega-neutron beam facility

By Edwin Cartlidge | Jul. 24, 2017, 4:30 PM

The world’s most powerful source of neutron beams will be less than half as powerful as planned when the facility begins scientific experiments in 2023. The European Spallation Source (ESS), under construction in Lund, Sweden, was designed to reach 5 megawatts (MW), but ballooning costs means that it will only achieve 2 MW in 6 years’ time—a reduced level that will likely limit the range of scientific studies it can carry out.
- Kulturně ukotvený positioning (Švédsko/Dánsko)
- Vědecký blockbuster (ESS/MAX IV)
- Life+Science
- Infrastruktura (Öresund - most)
- Populární mytologie
